Team Members:

1-Amr Rabea Mabrok Ibrahim...78

2-Eslam Esam Eldin Mohamed...26

3-Mohamed Maghawry Ismail...119

4-Mahmoud Abdel-Rahman Badr...126

5-Khaled Mohamed Elsaid Ahmed...150

Introduction

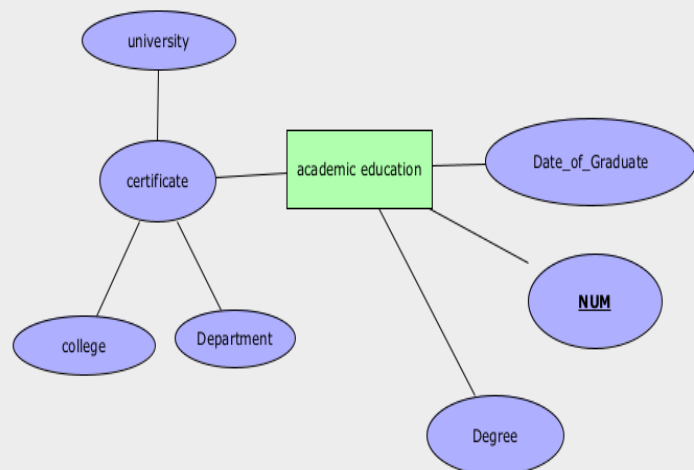

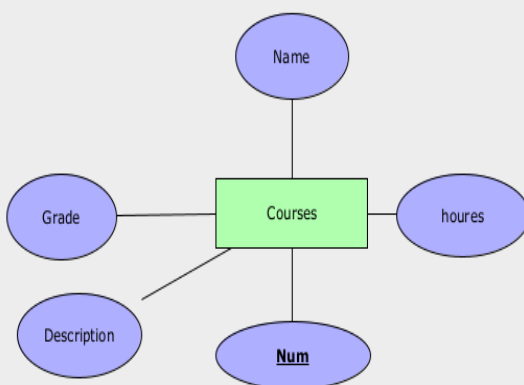

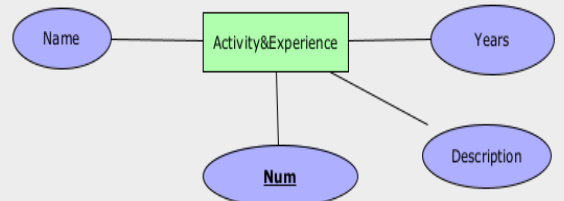

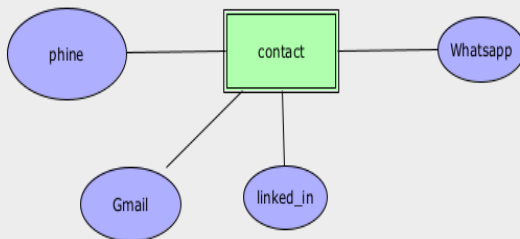

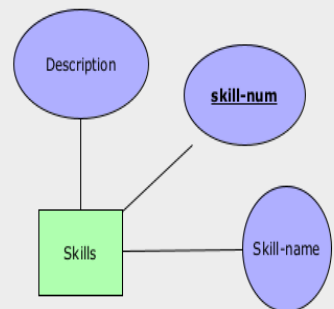

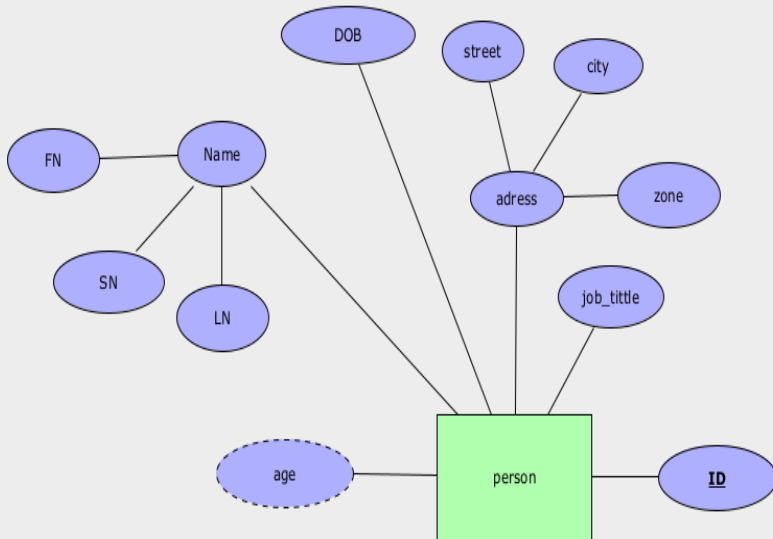

This project is to make it easier for Users to design their own CV where we ask them for their data that we want and then store it in the Database in an organized and correct way and display it in the final image in the form of a CV file.

We require the entry of certain data and on special conditions so that there are no errors, so we ask that the names be entered in the form of letters, for example.

The process of selecting Entities and Attributes, as well as the relationships between the Entities, must be consistent with the goal of the project and fulfill the requirements.

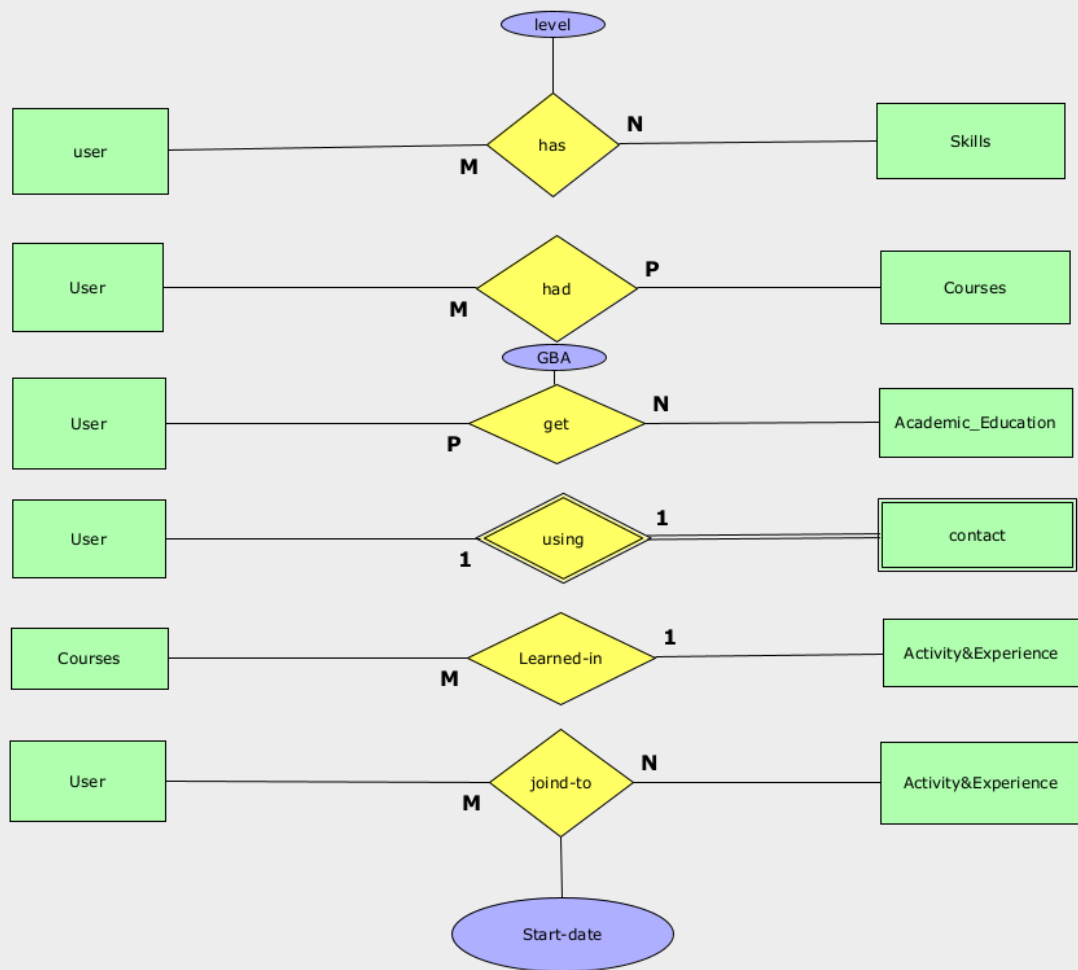

We have tried to achieve this with our small experience and our current information, and we hope that God will grant us success in that.

Entities With Attributes
